DETAILED ACTION

Response to Arguments

1. In the remarks filed 6-2-2006, the applicant argues the following:
 - A. New drawings have been submitted with the labels "marked-up version" and "Prior Art", and therefore overcome the objection to the drawings.
 - B. DeMarco is not available under 35 USC 102(b) because he does not disclose an input fiber.
 - C. Bachmann is not available under 35 USC 102(b) because he does not disclose an output antireflection means.
 - D. The election requirement should be reconsidered because applicant alleges that the number of species is reasonable and similar in scope to those claims already examined.
2. Argument A is convincing, the objection to the drawings is withdrawn.
3. Argument B is unconvincing, fiber section 16 reads on an input fiber.
4. Argument C is convincing, the rejection is withdrawn.
5. Argument D is unconvincing, the arguments of the applicant have been addressed in the previous office action. The election requirement is hereby made FINAL, pending the allowance of a generic claim, when the rejoinder of claims will be considered.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DeMarco et al. (USP No. 6195200).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 3663

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over DeMarco as applied to claims 1, 2 and 5 above, and further in view of Hecht (PTO-892 submission). DeMarco discloses the invention with all the limitations of claims 1, 2 and 5, but fails to disclose a semiconductor amplifier. Hecht teaches that SOA's and EDFA's are in some cases interchangeable, and sets provisions for interchanging them in an apparatus [pages 165-170]. Therefore, it would have been obvious to one skilled in the art (e.g. an optical engineer) at the time the invention was made, to substitute the EDFA of DeMarco with an SOA, for the advantage of miniaturization.

Conclusion

12. While patent drawings are not drawn to scale, relationships clearly shown in the drawings of a reference patent cannot be disregarded in determining the patentability of claims. See In re Mraz, 59 CCPA 866, 455 F.2d 1069, 173 USPQ 25 (1972).

13. The references made herein are done so for the convenience of the applicant. They are in no way intended to be limiting. The prior art should be considered in its entirety.

14. The prior art which is cited but not relied upon is considered pertinent to applicant's disclosure.

15. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
